

PROFESSIONAL SUMMARY

Strategic IT Business Leader with 23+ years of progressive experience driving measurable business outcomes through technology transformation and operational excellence. SAFe Certified Scrum Master and ITIL v3® expert specializing in designing and scaling IT service delivery models that directly impact revenue, profitability, and competitive advantage. Proven track record delivering \$2M+ in annual IT service value while simultaneously reducing operational costs by 30%, improving customer satisfaction scores, and accelerating time-to-market for enterprise solutions. Executive-level expertise in change management, strategic planning, and cross-functional collaboration with C-suite leadership. Combines technical foundation with business acumen to align IT strategy with organizational objectives, optimize resource utilization, and build sustainable competitive advantages through process innovation and talent development.

KEY BUSINESS IMPACT

- **Cost Optimization:** Reduced IT operational overhead by \$180K+ annually (15% savings) through resource optimization and vendor management
 - **Operational Efficiency:** Improved project delivery cycle time by 35% and sprint velocity by 28%, enabling faster business solution deployment
 - **Service Excellence:** Maintained 96% on-time IT delivery rate and zero critical SLA breaches, protecting mission-critical business operations
 - **Risk Mitigation:** Eliminated unplanned infrastructure downtime by 55% year-over-year, preventing revenue loss and reputational damage
 - **Portfolio Growth:** Scaled IT service delivery across \$15M+ client portfolio, expanding from 40 to 65+ engineers while maintaining service quality
 - **Process Innovation:** Implemented enterprise-wide change management framework that reduced project rework by 42%, improving delivery predictability
 - **Customer Retention:** Achieved 99.2% incident resolution within SLAs, driving customer satisfaction and contract renewals
-

CORE COMPETENCIES

Strategic Leadership & Business Management IT Strategy & Alignment | Business Case Development | ROI Optimization | Portfolio Management | Vendor & Stakeholder Management | P&L Accountability |

Service Delivery & Operations Excellence IT Service Management (ITIL v3) | Service Delivery Optimization | Release & Change Management | SLA Management | Incident Management | Operational Risk Mitigation | Continuous Improvement | Performance Analytics

Technology & Infrastructure Cloud Architecture (AWS, Azure, Docker, Kubernetes) | IT Infrastructure Management | Virtualization & Container Management | System Administration (AIX, Solaris, Linux, Windows) | Middleware & Enterprise Applications | Network Infrastructure (CCNA) | IT Modernization & Legacy Migration

Organizational Leadership Team Building & Development | High-Performance Team Management | Cross-Functional Leadership | Mentoring & Talent Pipeline Development | Agile Program Management (SAFe) | Executive Communication & Reporting

PROFESSIONAL EXPERIENCE

Tech Mahindra, Chennai

Project Manager | 2019 – Present

Business Impact: Managing \$2M+ annual IT service portfolio with 96% on-time delivery and zero critical SLA breaches across enterprise clients in Storage, Data Management, and Telecom sectors.

- Drove strategic IT transformation initiative, implementing SAFe framework across 40+ delivery professionals, resulting in 28% increase in delivery velocity and 35% reduction in time-to-market for IT solutions—directly accelerating revenue realization for clients
 - Optimized IT resource allocation and capacity planning through data-driven analysis, achieving \$180K annual cost savings (15% reduction) while maintaining or exceeding service quality standards and customer satisfaction metrics
 - Established enterprise-grade change and release management governance, reducing unplanned infrastructure downtime by 55% year-over-year and protecting mission-critical business operations from revenue-impacting incidents
 - Spearheaded IT modernization initiative transitioning service delivery from waterfall to Agile model, decreasing project rework by 42% and improving stakeholder satisfaction through enhanced communication and predictability
 - Managed vendor relationships and IT infrastructure contracts, negotiating pricing and terms that generated 22% cost savings on software licensing, cloud services, and managed support
 - Implemented performance analytics and business intelligence dashboards, providing real-time visibility into IT KPIs that informed strategic decision-making and enabled proactive resource planning
-

Technical Lead | 2017 – 2019

Business Impact: Built scalable IT operations center managing \$15M+ in enterprise client contracts while maintaining 99.2% SLA compliance and achieving 67% first-contact resolution rate.

- Scaled business operations from 40 to 65+ engineers across 14 enterprise clients, creating repeatable service delivery model that increased contract value by 35% while maintaining profitability and service quality
 - Directed multi-tier technical organization delivering 99.2% SLA compliance across 2K+ managed servers, directly protecting customer business continuity and enabling contract renewals with existing clients
 - Accelerated incident resolution by 40% through implementation of proactive monitoring framework and process standardization, reducing customer downtime costs and increasing Net Promoter Score (NPS) by 18 points
 - Developed and mentored technical leadership bench of 8 senior engineers and SMEs, building organizational capability to support 3-year client growth plan and reducing dependency on external resources
 - Partnered with product engineering and architecture teams to design custom IT automation tools, eliminating 50 hours of manual operational work per month and creating 12% operational efficiency gains
 - Systematically identified and resolved root causes of production incidents, implementing preventive controls that decreased repeat issues by 48%, improving operational resilience and customer confidence
 - Identified and capitalized on service expansion opportunities with existing clients, generating \$800K in additional annual revenue through enhanced service offerings and upsell initiatives
-

Sify Technologies Limited, Chennai

Deputy Manager - Systems | 2005 – 2017

Business Impact: Delivered mission-critical IT infrastructure and learning management services supporting 100K+ end users across pharmaceutical, telecom, and enterprise clients with 99.8% uptime SLA achievement.

- Led IT operations delivery for Novartis Pharma across Europe and US regions, managing critical infrastructure supporting 500+ concurrent users and generating \$3.2M in annual service revenue with 98% customer satisfaction ratings
- Architected and deployed enterprise Saba Learning Management System across AIX and Solaris platforms for 5 major clients, directly enabling organizational training delivery for 100K+ employees and generating \$1.5M in cumulative contract revenue

- Optimized IT infrastructure through preventive maintenance planning and vendor optimization strategies, reducing maintenance and licensing costs by 26% (\$420K annually) while improving system performance and reliability
 - Managed operations and application administration team of 12 professionals, implementing standardized processes and quality controls that achieved 98% customer satisfaction and reduced operational incidents by 31%
 - Deployed Moodle LMS for educational and corporate clients, delivering learning solutions to 8K+ users and generating \$650K in service revenue while enabling clients to scale training programs cost-effectively
-

Origin Infosys Private Limited, Chennai

Manager – Tech Support | 2002 – 2005

Business Impact: Promoted from Senior Network Administrator to Manager based on operational excellence; managed mission-critical infrastructure supporting 800+ users with 99.5% availability.

- Promoted within 2 years based on performance and leadership capability, advancing from individual contributor to people manager overseeing technical operations
 - Managed enterprise infrastructure supporting 800+ end users at Defense Services Staff College, Wellington, maintaining 99.5% system availability and ensuring zero unplanned business disruptions
 - Led technical support team of 5 engineers, implementing operational best practices and conducting skills development programs that improved incident resolution efficiency by 35% and reduced support costs
 - Configured and maintained secure Windows 2000 Domain environment, managing user access controls and implementing security protocols that protected organizational data and ensured regulatory compliance
